CROMTECH OUTBACK INVERTER GENERATOR 4.5KW

The Cromtech Outback Inverter Generator 4.5kw is the perfect power source for your 'home away from home' while you are on the road camping, caravanning or in a motorhome. With its pure sine wave technology, you can safely and confidently power items such as laptops, mobile phones, televisions and most household appliances.

Also known as a leisure generator, an important feature of this product is a removable multi-function power pack that is used as the generators start up battery and can be easily detached for use independently to charge phones, use as a torch or even jump start a small vehicle.

Some more great features of this product are the eco switch allowing you to minimise fuel consumption and allow up to 12 hours* use on seven litres of petrol and it is also super quiet to run at 55 to 60 decibels. This model also comes with remote start or electric start making it easy to operate, even from up to 20m away.
